

In today's fast evolving world, individuals who can excel in multiple disciplines are rare gems. I strive to be one of them. My name is Abdul Aziz bin Nawawi, a young multi-talented innovator hailing from Pandan Indah. From a young age, I have always been passionate about a wide range of fields spanning across academics, co-curricular activities, Quranic memorization, digital content creation and even charitable initiatives. My journey is a reflection of dedication, creativity, and perseverance which are qualities that continue to shape my path.

My academic journey has been a significant part of my life. From the beginning, I have always aimed for excellence in all areas of study which allowed me to earn numerous awards and accolades. In Year 6, I was awarded the Hadiah Murid Terbaik (Top 5 Award) securing the top student overall and winning multiple Best Subject Awards which are Bahasa Melayu, English, Mathematics, Science, Sejarah (History), Pendidikan Islam (Islamic Studies) and even Music. This sets the stage for my future success proving that I can excel in a broad range of subjects. I was also awarded the prestigious Anugerah Tokoh Murid, Tokoh Akademik, and Tokoh Ko-akademik which reflects my well-rounded excellence and my ability to balance academics

with co-curricular activities. Some of my national-level accomplishments include a Gold Award in the STEM Decathlon Challenge and the Confirm-A National Mathematics Competition organised by Universiti Tenaga Nasional (UNITEN), a Bronze Award in the Kangaroo Math Competition, and an impressive score of 94% in the National Space Challenge Quiz.

Building on this excellent foundation, in Form 1 I maintained my high academic standards securing 10A's in my year-end examinations enabling me to secure the top student in my batch. These accomplishments not only positioned me as a role model among my peers but also made me a standout student showcasing my versatility and ability to master a wide range of subjects.

Beyond academics, I have also devoted myself to Quranic memorisation, a discipline that requires immense focus, dedication, and perseverance. Some of the significant surahs I have memorised include:

- Surah Ar-Rahman (78 verses)
- Surah Al-Waqiah (96 verses)
- Surah Yasin (83 verses)

- Surah Al-Mulk (30 verses)
- Surah As-Sajdah (30 verses)
- Juz 30 / Juz Amma (37 surah)

This balance between academics and religious pursuits has shaped me into a more disciplined and well-rounded individual proving that education and faith can coexist beautifully.

I am also a big fan of Alan Walker, the renowned music artist famous for his electronic hits. My admiration for Alan Walker has not only influenced my personal interests but also my creative pursuits. One of the proudest moments of my life was attending the WalkerVerse Finale Concert at Axiata Arena where I got to experience the magic of Alan Walker's music firsthand. My strong passion for the artist and EDM music has also inspired me to create my very own Roblox game called Smurf Cat City, a fun creation which is a blends of my love for digital creativity, gaming and technology. I also share my enthusiasm for Alan Walker with the world through my Youtube channel (Beyond Abdul Aziz) where I have uploaded multiple videos about Alan Walker showcasing my deep interest towards the music artist.

In October 2024, I made an astounding move into the realm of AI-powered music. I created my first AI-generated song, "Beyond The Stars" using Suno AI, a groundbreaking AI music creation software which was inspired by my love for EDM Music and my admiration for Alan Walker. This song marks a significant milestone in my exploration of how cutting-edge AI technology and music can come together to create endless possibilities.

I am not only focused on personal success but also on making a positive impact in the world. I used my first Youtube paycheck to fund the distribution of 4000 litres of clean water to war victims in Gaza, demonstrating my deep compassion and commitment to helping those in need. My heartfelt message "May Allah give them peace, patience, and the strength to overcome these difficulties.

Aaminnn." reflects my sincere desire to make a difference in the lives of others who are facing extreme hardship.

Amidst my remarkable achievements, I have always remained deeply connected to my family and loved ones. My favourite cousin, Abang Luqman Razak shares a special bond with me. I see Abang Luqman as someone who is very similar to my father as they

have the same interests, behaviour, and appearance. Abang Luqman has accompanied me a lot and we spent a lot of time together especially playing Mobile Legends, where we formed an unseparable gaming duo which created cherished memories that continue to shape our bond today. I witnessed a significant chapter in Abang Luqman's life when he got married on 7th September 2024. This solemnization ceremony held at Menara Kuala Lumpur was followed by a wedding reception held at Kuala Kangsar on 15th September 2024 and another wedding reception held at Wilqadry Grandeur Hall, Conezion, IOI Resort Putrajaya on 28th September 2024. These personal events highlight our strong friendship that has flourished between us while proving that no matter how many milestones I achieve and how far I go in life, my family and loved ones will always remain a priority to me.

No one can predict what the future holds for me, but one thing for certain is that I never look back with regret as I approach life and every challenge with confidence and determination. As I move forward, I holds tightly to my personal motto "Always Strive For Success" which means that no matter where life takes me, I will always do my very best.
